ABOUT US

Lingerie, Made Under Your Label

Safe-T TECH International is a Sialkot-based clothing manufacturer with a dedicated **intimates & basics** division. We make the complete lingerie wardrobe — everyday and lace bras, nighties from cotton to bridal satin, and matched lingerie sets — cut, stitched, finished and quality-checked under one roof.

Our partners are **lingerie brands, boutiques and online sellers** across North America and Europe who need a manufacturer that starts small and grows with them. Trial quantities of 15–50 pieces per design let you test a style, a lace or a whole range first — with the same patterns, fabrics and finishing held ready for your reorders.

A note on how this catalogue is photographed: this is our **Model Edition** — each style is shown **worn by a model** in one on-model catalogue photograph, so your buyers can see the true fit, line and drape on the body. Every other picture is the product itself, shown close and honestly, exactly as it will arrive.

FABRICS & LACE

The Fabrics Behind The Range

French Lace

Fine Leavers-style floral lace — the signature of our premium bras, nighties and sets. Scalloped edges are finished along the natural pattern, never cut through it.

Satin

Sandwashed satin with a silk touch for nighties, robes and demi cups. Cut so the sheen runs evenly, pressed so it arrives smooth.

Stretch Mesh

Featherlight power mesh and tulle for wings, panels and linings — support that breathes, in every skin tone and colour.

Cotton-Modal

Soft jersey and ribbed cotton for comfort bras and nighties. Bio-washed, pre-shrunk, gentle against skin all night and all day.

Components & Findings

- Underwires in every size, cushioned at the tips so they never poke through.
- Hooks & eyes, rings and sliders in colour-matched coated metal — nickel-safe.
- Elastics dyed to match the fabric: strap, picot, scalloped and brushed comfort elastic.
- Garter clips and front clasps in real metal, cycle-tested before approval.

Colour Discipline

- Lace, fabric, elastic and hardware are dyed and matched as one lot — a set always matches itself.
- Bridal whites are checked under daylight and store light before cutting.
- Colourfast finishes tested to retail wash standards on every new dye lot.
- Any colour dyed to your swatch; core colours held consistent across reorders.

CRAFTSMANSHIP & QUALITY

How Each Piece Is Made

1. **Pattern & Fit Grading**
   Every bra style is patterned and graded across the full band and cup range — a 32A and a 44G are fitted as seriously as the sample size. Nighties and sets are graded XS–XXL on real body measurements.

2. **Cutting**
   Lace is cut with its motifs placed, not random: scallops land where the design puts them, and lace pairs are mirrored. Satin is cut on grain so the sheen runs evenly.

3. **Stitching & Assembly**
   Fine-gauge stitching, encased underwire channels, bar-tacked straps and fully lined gussets. Seams that touch skin are finished flat and soft — checked by hand, not just by eye.

4. **Fit & Final QC**
   Every style is fit-checked on the form at sampling and again in bulk. Finished pieces are measured, inspected, steamed and packed as sets — a set is never split.
